

## Silver Jubilee Bridge Cable Wrapping

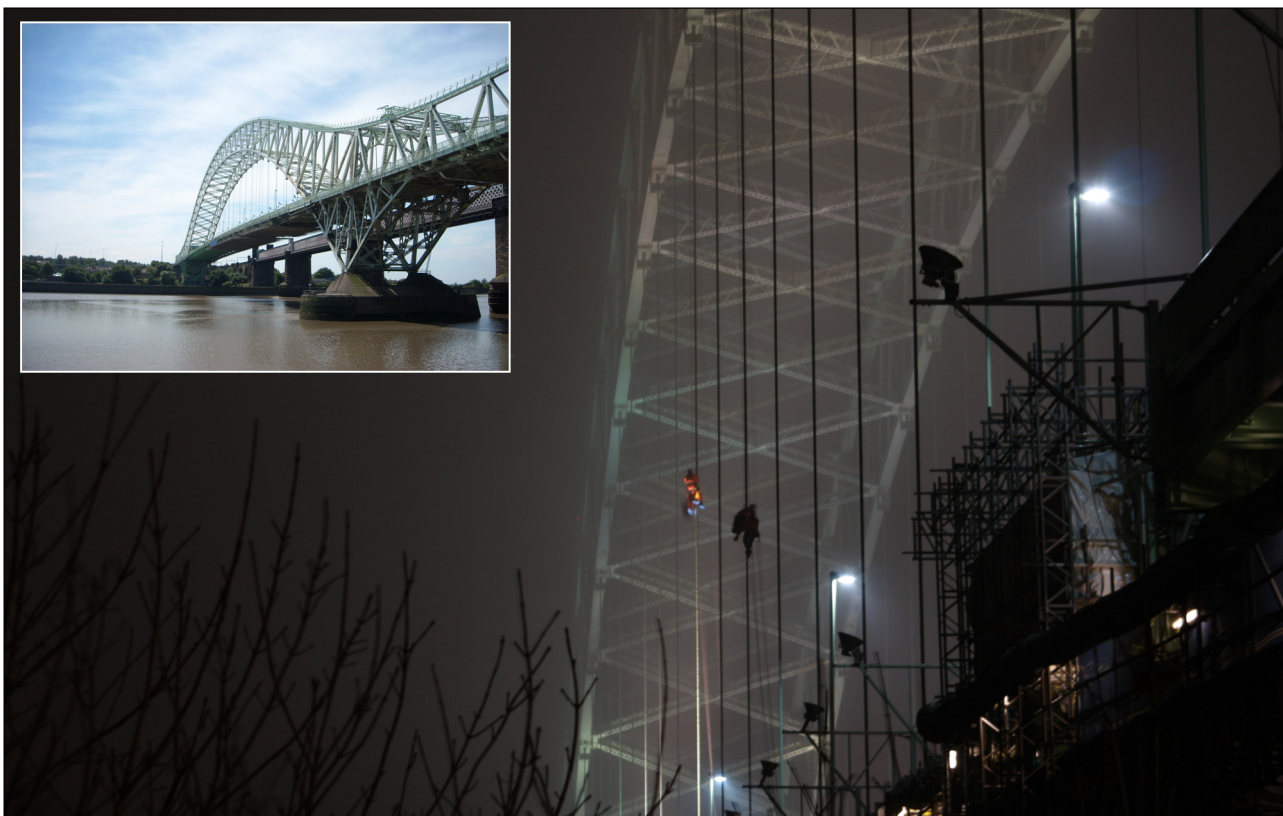

Image: Rope access team wrapping the cables to protect against corrosion.

### **Halton Borough Council Bridge Maintenance Partnership**

The project was carried out as part of the Bridge Maintenance Partnership for Halton Borough Council. The purpose of the project was to install protective wrapping to the hanger cables on the west elevation of the Silver Jubilee Bridge.

The installation works were carried out by means of roped access under overnight lane closures. This approach minimised disruption to the travelling public and local businesses.

In addition to the protective wrapping installed to the hanger cables, GFRP sheaths and cowls were installed to the lowers sections of each hanger to provide protection against vandalism.
